📍 Colombo, Sri Lanka

## Personal Profile

---

Motivated final year Computer Science undergraduate at the University of Colombo School of Computing with a strong foundation in programming, data structures, and core software development principles. Skilled in developing web-based applications. Passionate about building efficient, scalable, and user-focused solutions. Eager to gain industry experience, contribute to impactful projects, and continuously enhance technical and professional skills in the IT field.

## Education

---

**BSc in Computer Science**, University of Colombo School of Computing 2024 – Present  
Current GPA: 3

**Advanced Level (Physical Science)**, Chundikuli Girls' College 2022  
Results: 2A, C

**Ordinary Level**, Chundikuli Girls' College 2019  
Results: 6A, 3B

## Technical Skills

---

**Web Development:** HTML, CSS, JavaScript, PHP, MySQL, MongoDB, React

**Programming:** C, C++, Python (Basic), Dart

**Tools & Platforms:** Git, GitHub, VS Code, Linux/Ubuntu (command-line operations, compiling programs, Makefile usage), MySQL Workbench, Apache, XAMPP, WAMP, Figma, Canva, Jira, Microsoft Office (Word, Excel, PowerPoint)

**UI/UX & Design:** Wireframing, Prototyping, User-Centered Design

**Concepts:** Object-Oriented Programming (OOP), Data Structures and Algorithms, Software Development Methodologies, MVC Architecture, Microservices, Responsive Design, Clean Coding Practices

## Projects

---

**E-Labs - Industry Team Project (Active)** Industry Team Project

*Tech Stack: React.js, Node.js, Express.js, MongoDB, REST API, Docker, Microservices, GitHub*

- Developed an interoperable laboratory management platform in collaboration with SI Labs (Pvt) Ltd.
- Designed system integration with GP Clinic Management Systems for secure real-time exchange of laboratory data.
- Implemented authentication and role-based access control for secure system operations.
- Built laboratory test order management, sample tracking, and workflow processing modules.
- Developed automated test result processing, validation, and report generation features.
- Integrated RESTful APIs to enable seamless communication between clinic and laboratory systems.
- Created patient portal for accessing reports and medical history.
- Developed admin dashboard with analytics, reporting, and record filtering capabilities.
- Followed a microservices-based architecture to ensure scalability and system modularity.

## Pixora – A Freelancing Designer Platform

Academic Team Project

*Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, Git*

- Developed a full-stack web application for digital design service management.
- Implemented service categorization, project request handling, file uploads, and status tracking.
- Built customer and designer role-based dashboards with structured MVC-based backend logic.
- Focused on clean UI, responsive layouts, and usability.

## Chai Kade Landing Page UI

UI/UX Design Project

*Tech Stack: Figma, UI Design, UX Design, Wireframing, Prototyping*

- Designed a modern landing page in Figma as part of a collaborative UI/UX group project.
- Developed an engaging hero section and clear call-to-action areas to enhance user engagement.
- Applied consistent typography, color systems, and branding aligned with a tea shop identity.
- Created visually appealing layouts and reusable UI components following design principles.
- Contributed to wireframing, prototyping, and overall user experience design process.

## Ludo Game Simulation

Academic Project

*Tech Stack: C, Data Structures, Linux, Makefile*

- Developed a console-based multiplayer Ludo game simulation using modular architecture.
- Implemented dice rolling, token movement, turn management, and round-wise player status tracking.
- Applied structured programming, custom data types, and separation of concerns across multiple source files.
- Compiled and executed the project in a Linux environment using Makefile.

## Personal Portfolio Website

Personal Project

*Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, Git*

- Designed and developed a responsive personal portfolio website with a structured frontend and backend.
- Implemented dynamic project and skills sections along with a contact form and backend processing.
- Integrated database functionality for storing messages and demonstrated basic web security practices.

## SwiftLogistics Middleware Integration Platform

Academic Team Project

*Tech Stack: FastAPI, RabbitMQ, PostgreSQL, Docker, WebSocket*

- Built an event-driven middleware platform for managing order processing across multiple systems.
- Integrated API Gateway, RabbitMQ workflow, and worker orchestration across CMS, ROS, and WMS.
- Implemented SOAP, REST, and TCP-based integrations with retries and dead-letter queue handling.
- Developed real-time status updates using WebSocket communication.

## Certifications

---

- Web Design for Beginners – University of Moratuwa
- CSS (Basic) – HackerRank  E Certificate
- SQL (Basic) – HackerRank  E Certificate
- Python (Basic) – University of Moratuwa

## Soft Skills

---

Problem Solving, Attention to Detail, Team Collaboration, Time Management, Communication, Quick learner

## Leadership & Activities

---

- **School Prefect** – Maintained discipline and supported school administration.
- **Tamil Union Member** – Participated in cultural programs and event organization.
- **House Athletic Captain** – Coordinated house members and sports participation.

## Languages

---

Tamil (Native), English (Professional Working Proficiency)
